HARDY HERBACEOUS and ALPINE PLANTS

TWENTY-FIRST EDITION

Spring 1926

The WAYSIDE GARDENS CO., MENTOR, OHIO

America's Greatest Producers of Hardy Perennials

WAYSIDE GARDENS

Mentor, Ohio

Telephone, Mentor 82-W Telephone, Painesville 702-W

Several times it has been reported to us by customers that other nurseries are operated under the name of "Wayside Gardens" besides our own. In view of this fact, we wish to state that we have no branches and do not operate any other nurseries except at Mentor, Ohio. We do not have any agents representing us, but, in order to obtain the best results our plants should be ordered from us direct. Our plants, however, may be obtained through your local dealer. If ordered in this manner, look for our label.

READ CAREFULLY

All of the stock offered is grown on our own grounds, that grown from cuttings and divisions we know to be clean and true. Plants grown from seeds are from seed stock obtained from the most reliable sources.

OUR PLANTS ARE ALL FIELD GROWN, ARE GIVEN CONSTANT CARE AND CULTIVATION AND WHEN SENT OUT ARE STRONG AND WELL DEVELOPED, MUCH LARGER AND WORTH A GREAT DEAL MORE MONEY THAN POT-GROWN PLANTS.

We do not divide our plants before shipping but send the entire plant as dug. Dividing is only done in rare cases and only then because it is necessary to get the best results.

TERMS OF PAYMENT

Customers unknown to us will please send cash or references with their order. It is impossible for us to make immediate shipment to new clients who do not send references or cheque with their order. NOT SENDING REFERENCES OR ENCLOSING CHEQUE CAUSES DELAY IN THE FORWARDING OF THE STOCK YOU ORDER.

GUARANTEES

We guarantee all stock furnished by us to be first class, true to name, large and healthy, all of a size so as to give IMMEDIATE RESULTS.

However, there are so many causes for failure over which we have no control that we can assume no responsibility after stock is delivered. Poor soil, unfavorable weather, ignorant or careless culture—all contribute to failure and are beyond our control.

If, after receiving, you are not satisfied with the quality of the stock, let us know and we will replace anything you mention without charge or without question.

QUANTITIES ORDERED

We do not sell less than three plants of a kind unless offered otherwise; twenty-five plants are sold at hundred rate. Five hundred at thousand rate.

SHIPPING DIRECTIONS

Please give explicit shipping directions, stating whether stock is to be snipped by freight or express, and by what route.

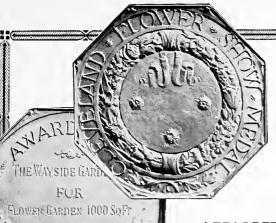

Small shipments can be sent by parcel post. All such shipments will be sent insured, insurance and postage to be paid by the customer.

THE WAYSIDE GARDENS COMPANY

E. H. SCHULTZ President MENTOR, OHIO

J. J. GRULLEMANS Sec'y-Treas.

Largest Growers of Hardy Plants in America

HIGHEST HONORS

WAYSIDE GARDENS exhibits win highest honors two years in succession. These awards represent the judgment of the keenest and most critical minds in our line of business. They reflect especially the plant material that went into the making of these gardens.

AWARDED BY CLEVELAND FLOWER SHOW AT THE SPRING FLOWER SHOW HELD IN CLEVELAND, 1925

Greetings to Gustomers Old and New,

1925

HREE factors are most essential to business success, which is only another term for work well done, service ably performed. ABILITY or skill, the MEANS to see things through, and ENERGY to follow the product through to the end desired—these factors, in a short decade, have caused this organization to grow in a comparatively short time to the leadership among hardy plant producers in America.

Back of it all, men and methods combine with but one ideal in mind—to produce and deliver the finest hardy perennial plants, rock plants, and lily bulbs obtainable anywhere. Our men have the skill! Combined with highly developed methods of culture on land ideally fit, we grow plants that within one short season produce finished gardens.

But our interest does not cease there. Above all, the buyer must be satisfied. It is our aim and ambition to cause Wayside Gardens to be looked upon as the last word in hardy plant service, the greatest source of a field-grown product, the like of which is unobtainable elsewhere.

We are deeply grateful to those who have helped us grow, for their confidence in our sincerity of purpose and their faith in our ability to make good any promise given in any of our advertisements or printed matter. With this goes the assurance that for 1926 we are splendidly prepared and equipped to take care of all orders that may be intrusted to us.

FOR

DUTCH BULBS AND WALL GARDEN PLANTED WITH ROCK PLANTS AT THE ANNUAL SHOW HELD IN SPRING OF 1924

Superb Tuberous-Rooted Begonias

THIS charming class of Begonias is perhaps the handsomest of all Summer-flowering, tuberous-rooted plants, and deserves even greater popularity. Improvements made in recent years in size, texture and coloring are really phenomenal, with flowers measuring from 4 to 6 inches across, and colors ranging from the purest white and the most delicate tints of pink, yellow and orange to the most intense scarlet and richest crimson. Particularly useful for planting in porch or window boxes in a semi-shady position. Their culture is of the simplest, and with the least

of pink, yellow and orange to the most intense scarlet and richest crimson. Particularly useful for planting in porch or window boxes in a semi-shady position. Their culture is of the simplest, and with the least regard for their requirements will repay with an abundance and brilliancy of bloom not equalled by any other class of plants. Our strain is the finest American grown stock obtainable.

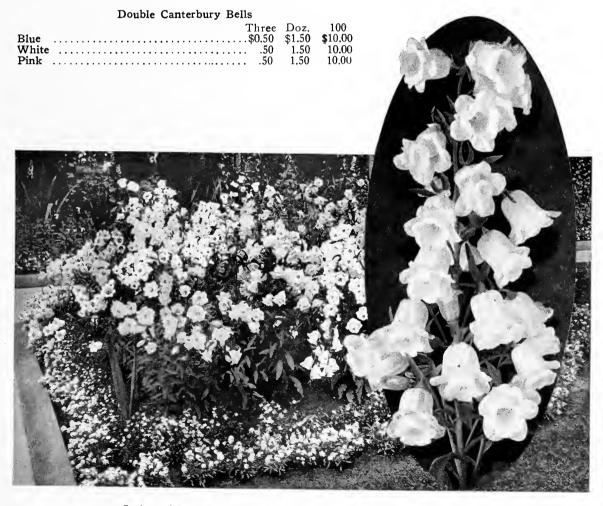

PRICES OF SINGLE TUBEROUS-ROOTED BEGONIAS

Three	Doz.	100	Three		
Crimson Shades\$0.75	\$2.50	\$18.00	White Shades\$0.75	\$2.50	\$18.00
Orange Shades	2.50	18.00	Yellow Shades	2.50	18.00
Scarlet Shades	2.50	18.00	Mixed Shades	2.50	18.00

Improved Strain of Canterbury Bells

OVELTIES, in a strict sense of the word, are in reality very rare amongst plants. Improvements, however, are more frequent and always looked for, and very often obtainable. Mr. Grullemans, while in Europe two years ago, inspecting stocks, was fortunate to discover an exceptionally fine strain of the well known Canterbury Bells. The quantity at that time was not sufficient to offer them at a reasonable price. Therefore, arrangements were made to grow quite a large amount of seed of this fine strain which it is now our good fortune to offer our customers. The plants are more vigorous, flower more profusely, and, if anything, the colors are a little more delicate than in the old type. We offer them in three types below, the regular Canterbury Bells, the Double Canterbury Bells, and the Cup and Saucer variety. The plants are strong and are bound to please. We must advise, however, that early planting is essential in order to obtain the best results.

Canterbury Bells			Cup and Saucer Variety
Three	Doz.	100	Three Doz. 100
Blue\$0.50	\$1.50	\$10.00	Blue\$0.50 \$1.50 \$10.00
White	1.50	10.00	White
Pink	1.50	10.00	Pink

Garden and Detail Picture Showing Our Improved Strain of Canterbury Bells.

Iberis Sempervirens Used as Edging.

Lilium Auratum

In the minds of most gardeners, Lilium auratum is considered the finest and showiest of the known Hardy Lilies. When grown to perfection, we are willing to admit that they are a magnificent sight to behold. Their fragrance is delightful, although it becomes oppressive should the flowers be cut and kept indoors in water. Lilium auratum, or Gold Banded Lily, as it is often referred to, prefers a cool, damp soil. We advise planting it in the front of shrubbery, planting the bulbs from six to eight inches deep. Like all Lilies, they object to manure and fertilizers. If the bulbs are planted late in the Fall, it is necessary that they be protected during the Winter. Experience, however, has taught us that Spring planting is the most advisable. We were fortunate in receiving from Japan a fine lot of bulbs which we can offer as follows:

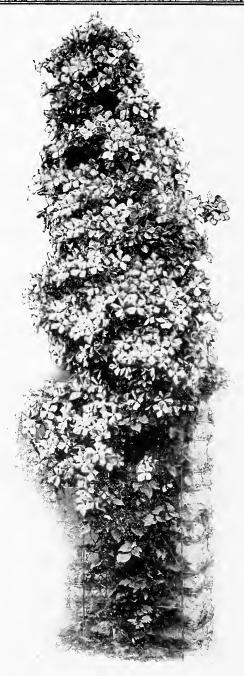

Each	Doz.	100
Large Bulbs\$0.55	\$5.50	\$40.00
Mammoth Bulbs	7.00	50.00

Clematis Orientalis

Clematis orientalis is also known as Clematis tangutica or graveolens. Unfortunately, this vine has never been as popular as the Clematis paniculata.

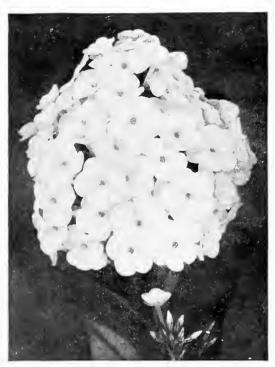

Lilium Auratum.

Clematis Orientalis or Golden Clematis.

We believe that it is largely due to the fact that the nurserymen themselves were not aware of the value of this vine. We recommend it strongly for covering unsightly corners, buildings or fences. It is rapid in growth. It produces in midsummer rich yellow flowers. Hence, its name Golden Clematis. Being vigorous, it often produces the second crop of flowers in the Autumn. We offer strong, two-year-old, field -grown plants. \$1.00 per three; \$3.00 per doz.; \$20.00 per 100.

Hardy Phlox of Recent Introduction and Unusual Merit

Phlox, Jules Sandeau.

Thor

While this is not a new Phlox, it has been very little known. It is in reality an improvement upon the old varieties of Rijnstroom and Rheinlander. The color is a lively shade of deep salmon-pink with a very bright eye. It is strong in growth, and very free flowering. It is a variety very well worth while having. We offer field-grown plants at \$1.00 per three; \$3.00 per doz.; \$20.00 per 100.

Europa

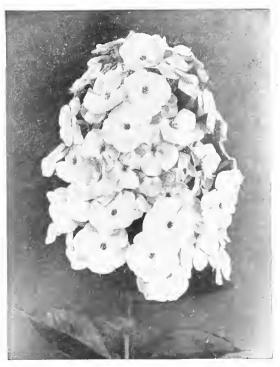

This variety, like Thor, while not exactly new, is not well known, and it is the best of the so-called "calico" types. The color is pure white with a brilliant red eye. It produces large heads on stiff stems and each plant will produce from six to eight flower spikes. A general effect when this Phlox is in bloom is that of cleanliness. Visitors to our nursery always select it. We believe this variety should be in every garden. Strong, field-grown plants at 85c per three; \$2.50 per doz.; \$15.00 per 100.

Commander

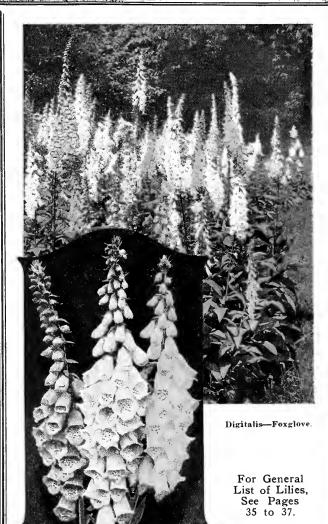

This is a beautiful, new, crimson-red Phlox and so far the most brilliant Phlox in existence. While a great many people object to red in their gardens, the color of Commander is so pleasing and inoffensive that no one need hesitate to plant it. We have tested it now for three years and find it the very finest red Phlox in existence today. We can offer strong, field-grown plants at \$1.20 per three; \$3.50 per doz.; \$25.00 per 100.

Jules Sandeau

This Phlox is of recent production and a worth-while variety, as it is a tremendously profuse bloomer. One plant often produces from six to eight flower spikes with large heads of pure pink flowers. It is very compact in growth and it does not reach any greater height than from eighteen to twenty-four inches, making it a very useful subject to plant in front in the border. We offer strong, field-grown plants at \$1.00 per three; \$3.00 per doz.; \$20.00 per 100.

Phlox, Thor.

Lilium Speciosum Magnificum

Rich ruby-carmine, margined white; stout of substance and broad of petal. This variety is by far the most magnificent in color, form and size. An invaluable garden plant, vigorous in its growth, failing but very seldom. One of the best border Lilies, reaching over 6 feet and more in height when established, and bearing more than ten flowers. Fine foliage. Does well in both light and heavy loam, but prefers soil with a mixture of peat. A partially shaded place, sheltered from high winds, suits it best. It is a beautiful Lily to grow under glass, where it has produced flowers measuring over 8 inches in diameter. Stem-roots; late Fall or early Spring planting. August-September flowering.

Price, large bulbs, 55c each; \$5.50 per doz.; \$40.00 per 100.

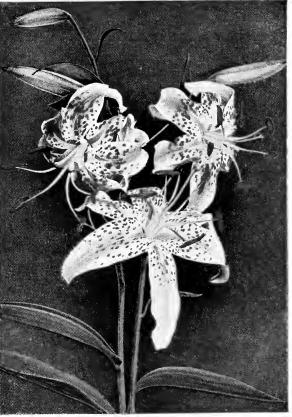

Digitalis - Foxglove

For stately and picturesque beauty it is not to be surpassed, and, planted in masses in the garden among shrubs or naturalized on the edge of woods, in the orchards or along brooks, it is extremely effective and satisfactory. It is a biennial, but, as it renews itself from self-sown seed, it may be treated as a perennial.

New Giant Shirley Foxgloves

We were able to buy the first seed offered by the originator a year ago and now have a fine lot of field-grown plants of the Giant Shirley Foxgloves. They are a genuine "Shirley" production of extraordinary size and vigor, growing 5 to 6 feet tall. The flower-heads are over 2 feet long, crowded with big, bell-shaped blossoms. Colors range from white and shell-pink to deepest rose, many attractively dotted with crimson or chocolate. Furthermore, they are more apt to be of perennial habit than the old-fashioned Foxgloves.

Price, 3 for \$1.00; \$3.00 per doz.; \$20.00 per 100.

Lilium Speciosum Magnificum.

	1.00	3.00	20.00
Persicum. Somewhat deeper in color than Grandiflora	1.00	3.00	20.00

Achillea Ptarmica, "The Pearl."

Aconitum Fischeri.

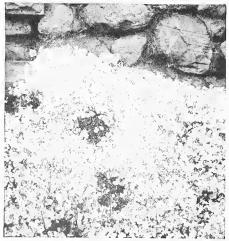

The Lovely Aethionema.

Anchusa Italica.

Alyssum Saxatile.

Arabis Alpina.

AGROSTEMMA (Rose Campion).

AJUGA (Bugleweed).

A useful plant for the rockery and for carpeting the ground, particularly in shady positions, as under trees where grass will not grow; flowers in May and June.

Three Poz. 100

Genevensis. Grows 6 to 8 inches high; dense spikes of blue flowers. \$1.00 \$3.00 \$20.00 Reptans rubra. Grows 3 to 4 inches high, with deep purplish blue flowers.............................. 1.00 3.00 20.00

ALYSSUM (Rock Madwort).

Very popular for beds, borders and Winter flowering; of easlest culture and very free blooming. Seed may be sown very early in the Spring and up to June 15th, also in the Fall for early Spring blooming.

Saxatile compactum. Broad masses of bright yellow flowers in early Spring. An excellent plant for the rockery or front of borders. 1 ft. \$0.85 \$2.50 \$15.00 Wiersbiechi. Dense masses of canary-yellow flowers. Splendid rock or edging plant. 9 inches . . .85 2.50 15.00

AMSONIA.

Tabernaemontana, 2 to 3 feet. Late
May and early June. Small and
numerous flowers of light blue in
panicles. Smooth foliage resembling the olive. For the hardy border or planted among shrubbery., 1,20 3,50

ANCHUSA (Alkanet).

For producing a mass effect of brilliant blue, the Anchusas cannot be surpassed. Dropmore, the darkest one, is most effective. Opal has larger flowers and is the best of the tall varieties, producing a solid sheet of soft turquoise-blue. They should be treated as biennials, as the old plants exhaust themselves at the end of two or three years. They reproduce themselves, however, from self-sown seed. The blooming season can be extended for several weeks by cutting the spikes as soon as the flowers fade, thus preventing seeding.

Anemone Hupehensis.

Asclepias Tuberosa.

Herbaceous and Alpine Plants

Aquilegia-Columbine.

Armeria-Sea Thrift.

Arenaria Montana.

Artemisia Lactiflora.

AQUILEGIA (Columbine).

As a cut flower the Long-Spurred Aquilegias are the daintiest of our outdoor grown flowers. They come in blues, whites and yellows, and shades of pink and rose in strains reasonably true. Practically all the various shades and colors are in the Coerulea Hybrids. They remain in bloom for a long season and are vigorous and long lived. They are not at all particular as to soil or location, although they prefer a sandy leain and a moist but well drained, sunny position, and usually make themselves at home in any hardy border or rockery. Their period of flowering covers the late Spring and early Summer months. Taken as a whole, they are a most important part of the hardy garden, and should be grown in quantity by every lover of old-fashioned garden flowers.

Maritima alba. 3 to 6 inches. May and June. Tufts of deep green foliage; white flowers	2.50	15.00

HARDY ASTERS (Michaelmas Daisies).

The many species, widely distinct from each other in habit and form, are. with a few exceptions, all native of North America. It is in Europe, however, that our Asters have been most highly appreciated. Many improvements have been made by European growers, and many hybrid forms have been produced by crossing the different species. For the best results, they require division and replanting every third year.

HARDY GARDEN CHRYSANTHEMUMS

The following varieties are perfectly hardy if grown in a place not too wet. After through flowering cut the dead stalks down to two or three inches of the ground and cover with dry leaves. In the Spring, after they start to grow, divide so one shoot will remain for the future plant.

CHOICE NAMED VARIETIES

The varieties offered below comprise the choicest new hardy outdoor sorts. We have chosen the earliest to bloom, so that the full enjoyment of these best-of-all Autumn flowers may be derived by those in northern territories where Winter comes early.

Best results are obtained from pot-grown plants. Supplied from 2%-inch pots in Spring only.

CHRYSANTHEMUMS-Continued

HARDY OLD-FASHIONED VARIETIES

We collected from old gardens some of the old-fashioned Chrysanthemums which are really hardy and which bloom in October and November, after all other outdoor flowers are gone. Often in bloom when the snow is on the ground; are very showy. 3 to 4 feet high. When in bloom are a perfect mass of flowers.

		Three	Doz.	100

Old-Fashioned	Hardy	Yellow 1.00	3.00	20.00

The above varieties are supplied in strong, field-grown

SPECIAL COLLECTION

The following ten varieties we recommend as being a very fine collection for any garden or as cut flowers. Supplied from 2%-inch pots in Spring only. Price for 3, 85c; per 12, \$2.50; per 100, \$15.00.

CARMELITA

Earliest of all. Very free flowering. Canary yellow. Plant will have from twenty to thirty blossoms.

CRANFORDIA

In this variety we have an early flowering 'Mum that covers every possible point; perfect in flower and stem; foliage up to the flower and every plant will carry twelve to twenty beautifully finished flowers. Color deep, bronzy yellow.

FIRELIGHT

Brilliant carmine, shaded with scarlet. In perfect condition to cut October 1st, either outdoors or under glass. The earliest and best thing in its color.

MRS. ALBERT PHILLIPS

Deep lavender in color, one of the earliest of the Singles to develop this year; fully open October 5th. When first opening the contrasting color is a lovely cream, charming and beautiful.

MRS. FRANCIS H. BERGEN

Creamy white, with center of rosy pink, shading to lighter pink on the outer edges. As the flower ages it changes to a charming pale lavender. We consider this the most valuable of the many sorts introduced for garden work; blooms October 25th.

MRS. HARRISON CRAIG

One of the most unique colored varieties we have ever handled or disseminated, the groundwork of the petals being yellow overlaid with brilliant orange-crimson, which on first inspection looks as if it were fine powder sprinkled over the flowers.

MRS. H. HARRISON

One of the first of the Pompons to come in flower, being in excellent condition to cut outdoors the middle of October. The color of this variety indoors is a dainty, exquisite blush. As grown outdoors it is several shades deeper. Mrs. Harrison has a very vigorous constitution and makes a beautiful bush outdoors.

MRS. NELLIE KLERIS

This variety is an improved Lillian Doty, but the color is more evenly diffused over the flower. The blooms are equally as large as Lillian Doty, but better divided on the stems. A fine, sturdy, dwarf grower. Beautiful clear pink.

TINTS OF GOLD

The earliest bronze to flower, and makes a wonderful glowing bush if not disbudded. When the individual flowers are disbudded they will produce flowers as large as the greenhouse sorts.

WHITE DOTY

A sport of the popular variety, Lillian Doty, and a duplicate of the parent in every way, except color which is pure milk white.

Chrysanthemum, Cranfordia.

Chrysanthemum, Firelight.

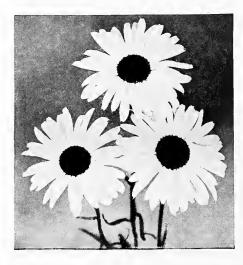

Chrysanthemum, Tints of Gold.

Shasta Daisy, Mrs. C. Lowthian Bell.

Daisy, Glory of Wayside.

Daisy, Etoile d'Or.

CHRYSANTHEMUM MAXIMUM (Shasta Daisy).

The improved varieties of Marguerite, all allied to the Shasta Daisy that adorns our fields in the Spring, are among the most useful of our garden flowers. Not only have these flowers been greatly improved in size and form, but there are now early and late blooming varieties which give a succession of long-stemmed flowers so valuable for vase decoration during four months of the year. Glory of Wayside is a variety worthy of attention, and Etoile d'Or is robust and free-flowering. Mrs. C. Lowthian Bell has enormous flowers with strong stems. The Shasta Daisy has a yellow center with long, white petals, the slender stems springing from the base of the plant, and is most attractive either in the perennial border or as a cut flower. Common kinds like Alaska have been discontinued.

DELPHINIUM (Larkspur).

DELPHINIUM (Larkspur).

English Delphiniums are the most beautiful hardy plants in cultivation, for they have such an immense variety of beauty and increase in size, in beauty, and often in quantity, year after year. Some varieties grow 8 feet high in rich soil. They have immense spikes of most beautiful flowers of every imaginable shade of blue, and their season is long; in fact, they will bloom from Spring till Fall.

The culture of Delphiniums is exceedingly simple. They thrive in almost any position, and may be planted at any time of the year, provided that in Summer the plants are not too forward, and that they be well watered if the weather is dry. The soil may be a rich, friable loam, which suits them finely; but any soil, even hot and sandy, if well watered and manured, will give excellent results. Placed in lines, as a background to a border, or in groups of, say, three plants at intervals, the effect of the Delphinium is exceedingly fine. A succession of flowers may be expected from Spring to early Autumn, especially if the spikes, which have done flowering early, be cut down to the ground; fresh growth will then be produced which will give blossoms. Watering in Summer will increase size of spike and flower. Top-dressing is greatly recommended on certain soils, instead of the bare surface of the ground being left exposed to the sun. Some of the neater dwarf Alpine and other hardy plants may be utilized to plant between and around Delphiniums. Coal ashes strewn over the crowns will protect the plants from slugs through the Winter and Spring. Any garden soil suits the Delphiniums.

Three Spectabilis (Bleeding Heart or Seal Flower). An old-fashioned favorite; its long racemes of graceful heart-shaped pink flowers are always attractive; it is used largely for forcing, and is perfectly at home in any part of the hardy border, and especially valuable for planting in clumps. Each, 60c\$1.70	Doz.	100
dwarf-growing sort, with beautiful finely cut foliage and showy racemes of pretty pink flowers throughout the season. Too much cannot be said for this fine border plant as it is equally at home in full shade or sun and perfectly hardy anywhere. Bailey's "Encyclopedia of American Horticulture" says in description: "The handsomest foliage of any border plant in the entire collection." This variety of Bleeding Heart is the only kind which will replace the Spectabilis which is so hard to get. Will grow in any climate	\$5.00	\$40.00
under any conditions. 2-year-old	$\frac{3.50}{2.50}$	$\begin{array}{c} 25.00 \\ 15.00 \end{array}$
DIGITALIS (Foxglove). For stately and picturesque beauty it is passed, and, planted in masses in the garde or naturalized on the edge of woods, in along brooks, it is extremely effective a It is a biennial, but, as it renews itself seed, it may be treated as a perennial.	nd satis from se	ards or factory. lf-sown
Giant Shirley Foxgloves. We now	Doz.	100
have a fine lot of field-grown plants of the Giant Shirley Fox-gloves. They are a genuine "Shirley" production of extraordinary size and vigor, growing 5 to 6 feet tall. The flower-heads are over 3 feet long, crowded with big, bell-shaped blossoms. Colors range from white and shell-pink to deepest rose, many attractively dotted with crimson or chocolate. Furthermore, they are more apt to be of perennial habit than the

DIANTHUS ALLWOODI

(New Perpetual-Flowering Hardy Pink).

This is a most important addition to our list of perennial plants. They are perfectly hardy and flower continuously from early Spring until late in Autumn; the flowers are much more substantial and larger than the old type of Hardy Pinks, and are borne on long stems suitable for cutting; deliciously clove scented. All good, thrifty, young plants.

Tall growing plants closely allied to the Sunflower; ing in late Summer and Fall great masses of large, dike flowers in shades of yellow and orange. Three Doz.	bear- laisy-
Autumnale superbum. Broad heads of deep golden yellow flowers in late Summer. Grows 5 to 6 feet	100
	20.00
Autumnale rubrum. A splendid new variety; deep ox-blood-red, changing to terra cotta. 5 to 6 feet.	
September 1.00 3.00	20.00
Bigelovi. Quick growing, branching plants, 2 to 3 feet; quite showy during August with terminal clusters 1½ inches, deep yellow flowers; brown centered	20.00
Pumilum magnificum. Large, golden yellow flowers; one of the most floriferous and useful border plants in cultivation 1.50 4.00	35.00
Riverton Beauty. Pure lemon-yellow, with large disc of purplish black	20.00
Biverton Gem (New). Old gold, suffused with bright terra cotta, changing to wallflower-red. Au- gust to October 1.00 3.00	20.00

HELIANTHUS (Hardy Sunflower).

The perennial Sunflower should always be planted in masses, where they may have plenty of room, against background of shrubbery, or naturalized in wild gardens or woodlands. They produce a grand effect impossible to describe. In combination with hardy Asters, where broad color effects are wanted in late Summer, they have few equals. They are profuse bloomers, producing an unlimited supply of flowers for decoration.

diffillited supply of howers for decoration.		
Three	Doz.	100
Acutifolius. An extremely beautiful October variety, with large flowers of a delightful shade of golden yellow\$0.85	\$ 2. 5 0	\$15.00
Mollis. An improved variety of Helianthus lactiflorus; of taller growth and having larger flowers. A decided improvement and most beautiful sort	2.50	15.00
Maximiliani. The latest of all. Golden yellow flowers in graceful sprays in October. Fine for cut-	2.00	10.00
ting. 6 feet	2.50	15.00
shape and finish. 4 feet85	2.50	15.00
Sparcifolius. The best of the Summer-blooming varieties of hardy Sunflowers. Flowers 3 inches in diameter and freely produced. Plant grows 3 to 4 feet high, and spreads rapidly. Fine for the border, and for planting among		
shrubs 1.00	3.00	20.00

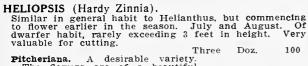

HELIANTHEMUM (Rock or Sun Rose).

Low-growing evergreen plants, forming broad clumps, and which during their flowering season, July to September, are hidden by a mass of bloom; for the front of the border, the rockery, or a dry, sunny bank.

		Doz.	100
Mutabile. Golden yellow	\$1.00	\$3.00	\$20.00
Pink Shades		3.00	20.00
Red Shades		3.00	20.00
		3.00	20.00
Appeninum	.85	2.50	18.00

Helianthemums belong to the finest border or rock plants, but they should be trimmed back before planting as they are otherwise hard to establish. We offer also 3-inch pot plants ready to bloom in the same colors at the additional charge of 5c per plant. Specify pot plants when ordering.

HEPATICA (Liver Leaf).	Three	Doz.	100
Coerulea. A pretty native, Spring flowering plant, with blue flowers			•
prefers shade, but will do fairly well in an open situation in moist	ŕ		
rich loam. We offer large, estab

itcheriana. A desirable variety.
The flowers are of a beautiful
deep golden yellow, about two
inches in diameter, very thick
texture and a useful cut flower...\$0.85 \$15.00 \$2.50

cabra excelsa. A new variety with very rich chrome yellow flowers, turning to a bright yellow as they mature. These are almost double, having from 4 to 5 rows of petals, and are produced very profusely. The plant is about 3 feet high, and from mid-July to the end of September makes an effective display. Scabra excelsa.

HEMEROCALLIS (Yellow Day Lily).

Hemerocallis have long been favorites in our garden, and are always included in any list of the most popular hardy plants. All of the varieties of Hemerocallis are desirable and beautiful. The tall, graceful, grasslike foliage is very handsome and sets off the charming lily-like flowers very effectively. They look particularly well naturalized along streams or on moist banks, and will thrive most

Heliopsis.

Heuchera Hybrids.

Hepatica Coerulea.

Double Hollyhock.

Hibiscus, Crimson-Eye.

Hyacinthus Candicans.

HOLLYHOCKS (Althea Rosea).

The Hollyhock is an old garden favorite, full of sentiment and association with a distant past. It is a plant of strong, vigorous growth and noble aspect, with elegant camellia-like flowers that form perfect rosettes of the most lovely shades of color. They require a deep, rich soil and a sunny corner, but will repay by their gorgeous and lavish bloom all the attention bestowed upon them. Painters choose Hollyhocks as subjects for floral paintings oftener than any other flower. We suppose the reason for this is that artists have a keener appreciation of beauty than other people, and recognize that the common single Hollyhock is one of the most stately, picturesque and beautiful plants in the world. Nothing can be more effective than a large group of single Hollyhocks, and once planted they will literally take care of themselves even if planted in the grass. We know of patches that have not been cultivated or disturbed in any way for twenty years. Some people think double Hollyhocks are more beautiful than single. They are mistaken, although the doubles are beautiful, but inclined to be topheavy. Hollyhocks planted in the Fall will bloom the following Summer.

DOUBLE. Separate colors, as follows:

Maroon White	Bright Rose Dark Purple		
Yellow	Apple Blosso	m	
Newport Pink	Pale Lilac

Mallow Marvels. A robust type of upright habit, producing an abundance of flowers of enormous size in all the richest shades of crimson, pink and white. Three

New Giant-Flowering Marshmallow.

A wonderfully improved form of our greatly admired native Marshmallow or Rosemallow, in which not only the colors have been greatly intensified, but in which flowers of enormous size, frequently 10 to 12 inches in diameter, have been developed. Equally at home in all positions, having the same vigor in dry and wet ground; perfectly hardy and are very floriferous, blooming from early in July until late in September. They are the most beautiful and hardy of all herbaceous plants, their dignified spikes of huge blossoms make them indispensable for large groups and mixed borders. We offer three distinct colors.

Red, Pink or White and Crimson

Herbaceous and Alpine Plants

Iris Kaempferi-Japanese Iris.

Iris Pumila, Varieties.

Siberian Irises

IRIS KAEMPFERI (Japanese Iris).

The magnificent Iris Kaempferi belong to the Apogons, and a field of them in bloom is a most gorgeous sight. Seeing them for the first time, one cannot withhold an exclamation of surprise, and having once seen can never forget their striking beauty.

Culture. The secret of success is to keep the ground well stirred, never allowing it to bake or become hard. Any good mellow clay loam will grow Japanese Irises to perfection, if well enriched. They like plenty of moisture during the growing season, but flooding with water is not a necessity, as many suppose. Water standing over the plants for a great length of time in Winter is fatal to them.

Time to Plant. Latter part of August to the beginning of October is the best time. Late plantings should be protected by a light covering of straw or leaves after the ground is permanently frozen, to prevent roots from being heaved out of ground by frost. In northern sections late planting had best be deferred until Spring.

Three	Doz.	100
Azure. Double. Immense flower, exquisitely wavy; mauve-blue with darker halo surrounding the yellow blotch at base of petals\$1.35	\$4.00	\$30.00
Dominator. Single. Rich indigo-blue with narrow white stripes and light center. One of the finest and richest colors 1.35	4.00	30.00
Gold Bound. A fine double, pure white, enriched by a creamy glow from the gold banded center. 1.35	4.00	30.00
Indo. Single. Broad, wavy petals of great size, color dark rich blue, only slightly veined. The yellow central blotch is unusually bright. 1.35	4.00	30.00
La Favorite. Large, fine, white, freely veined blue, and a rich purple center	4.00	30.00
Mount Hood. Double. Light blue shaded darker, bright orange center	4.00	30.00
Ondine. Single. White; flowers are of immense size; very free flowering	4,00	30.00
Purple and Gold. Enormous double flowers ten inches across; early and free blooming. Color rich violet-purple with white petal- oids, tipped violet. The conspic- uous golden throat extends out- ward in sharp bluish white rays. 1.35	4.00	30.00

handsome foliage. Fine border		
plant and a grand subject for		
planting near water, where it		
blooms profusely	2.50	15.0 0

IRIS GERMANICA (German or Flag Iris).

The Iris is one of the finest, if not the finest, of our hardy plants. Not particular as to soil or location, but asking only that the sun shine on it. It throws up spikes of bloom that are marvelous in their delicacy of structure and the colorings which are exquisitely dainty are wonderful in their blendings and variety.

They are very effective planted in groups and if used for borders are particularly desirable in that the foliage remains fresh and upright after the blossom stalks are removed.

Plant in late August or early September preferably. Spring will do also.

Spring will do also.

The roots offered in this list are from plants transplanted a year ago and are of a size large enough to bloom next Spring. The collection is up to date and consists of the best and newest standard varieties.

Twenty-five roots at 100 rate, 250 roots of a kind at 1000 rate. We guarantee the usual Wayside Gardens quality. The letter "S" refers to the standards or upright petals; "F" the falls or drooping petals.

Choice New Introductions

Cecil Minturn (New). Soft cattleya-rose. A beautiful flower with broad petals, gracefully waved and crinkled; one of the finest Irises for size and extreme beauty ... Each, \$2.00

LILIES (Hardy Garden Varieties).

Noble and beautiful flowers which are too frequently strangers in American gardens. It is always with a touch of sadness that we note the infrequency of Lilies in American gardens. No flower, it seems to us, is at once so noble and so beautiful. Nor is there lack of variety. Furthermore, the Lily is singularly valuable for its charming effect on the skyline of the garden when in bloom.

There is a notion that Lilies are "hard to grow." Some of the rarer species are, it is true; they not only stubbornly refuse to make themselves at home in the garden, unless conditions are precisely to their liking, but some of them cannot endure the northern Winter without the necessary covering of litter, which many other tender plants require. Unless one goes in for Lilies to the extent of making a hobby of them, however, these can all be left to the collector and there will be quite enough species remaining to give one a Lily season in the three months' duration of which loveliness follows loveliness with breaks of only relatively brief length. We say species for the reason that the Lilies in cultivation show an exceptionally low percentage of horticultural varieties. Possibly because Nature made every species perfect to begin with, the hand of the hybridizer has been loath to endeavor to "paint the Lily," as it were.

The varieties which we offer in these three pages are such as have, with us, withstood the Summer's drought and the severest of Winters, and have thus proven themselves worthy of a place in your garden.

DELIVERY—This depends upon the arrival of the bulbs from our foreign sources. Many get here too late for Autumn planting, thus necessitating carrying over the bulbs until Spring. Those marked (**) thus, should be planted in the Fall only; those marked (*) may be planted in Spring or Fall, preferably the latter; all the others are for Spring delivery.

are for spring delivery.			
Auratum (Golden-Banded Japan Lily). Undoubtedly one of the finest. Its large, graceful, fragrant flowers are composed of six petals of a delicate ivory-white color, thickly studded with chocolate-crimson spots and striped through the center a golden yellow; 3 to 5 feet. July to September. Large bulbs\$ Mammoth bulbs	0.55	Doz. \$5.50 7.00	
Auratum platyphyllum. Also called "Macranthum." This is a robust growing form; the stem is stouter and attains a greater height; the leaves are much broader; enormous flowers, white, richly spotted yellow. Undoubtedly the choicest of all.			
Large bulbs	$.55 \\ .75$	$\frac{5.50}{7.50}$	$\frac{40.00}{55.00}$
Auratum rubro vittatum. Similar to the above but the flowers are dark rose-pink	1.00	10.00	75.00
Auratum Pictum. Is another splendid form of Auratum and fortunately a strong grower	.75	7.50	55.00
Batemanni. Strong stems with five to ten flowers of a reddish orange color. July-August. 3 to 4 feet.	.40	4.00	30.00
Browni odorum. A vigorous grower with large, trumpet-shaped flowers of clear white, veined outside with purplish maroon	.90	9.00	65.00
*Canadense. Our dainty, beautiful native Lily. Graceful and charming flowers	.30	2.75	18.00
**Candidum (Madonna or Annunciation Lily). This is the old-fashioned garden Lily, and one of the most beautiful. Iteady in September only. First size	.35	3.50	30.00
*Chalcedonicum (Scarlet Turk's Cap Lily). Small flowers in loose clus- ters with recurved, bright red petals. A handsome and attract- ive Lily. July. 3 to 4 feet	1.50	15.00

PAPAVER (Poppy).

Oriental Poppies are the regal representatives of this popular genus, growing 3 to 3½ feet high, and far surpassing in splendor of bloom all the annual and biennial kinds, and for a gorgeous display of rich and brilliant coloring nothing equals them during their period of flowering in May and June, and whether planted singly or in masses their large flowers and freedom of bloom render them conspicuous in any position. They are of the easiest culture; almost any kind of soil suits them, but they do best in deep, rich loam. Set the plants out in the Fall or early Spring before the first of May—give them water occasionally during dry spells in the early part of the season. Mulch with stable litter in the Fall; and they will increase in size and floriferousness for several years. We offer the best of the latest introductions, as well as the distinct standard varieties.

Three		
Orientale (Oriental Poppy). Tremendous scarlet, cup-shaped blooms of brightest crimson-scarlet, with large, purplish black blotches at base of petals, creating a wonderful contrast when bloom is fully open. PEONIES

The varieties we offer are arranged alphabetically, and where known, the name and date of the introducer immediately follows in parentheses. As color comes first in the choice of Peonies, we have placed the color on the same line as the name. Size and type naturally appeal next, and so follow the color. Having found these satisfactory in any variety described, one naturally next looks for the character and habit of the plant. To further aid purchasers we shall be pleased to give by letter further information to intending purchasers. Figures following name indicate rating by American Peony Society. Peony Society.

NEW JAPANESE PEONIES

A type not very generally known, but in every community wherever established is awakening great interest and enthusiasm. The opened flowers are of extra wide spread, with one or more layers of broad guard petals which act as a cup to the mounded center. In place of the pollenbearing stamens which center the Single Peony flowers, in this class the stamens and anthers are greatly enlarged into narrow, thick, twisted petaloids of various colors, forming a dense cushion.

We heartily recommend our list to those who want something different from the other fellow's; and to Peony planters generally, as types which will add zest and beauty to their gardens.

Orders for the following booked now for September delivery.

PHLOX.

PHLOX DECUSSATA (Hardy Phlox).

Perennial Phloxes succeed in almost any soil enriched with manure in Spring, and in hot weather an occasional soaking of water. If the first spikes of bloom are removed as soon as over, they will produce a second supply of flowers, continuing the display until late in Autumn. These later blooms are often finer than the first.

These later blooms are often finer th	an t	he first

Fitzer (The Everblooming Flame Flower). The free and continuous blooming qualities of this variety have made it one of the great bedding plants, and when we consider that there are few flowering plants which are suitable for massing under our severe climatic conditions it is little wonder that such an elegant subject should become so popular. Succeeds in any ordinary garden soil, but responds quickly to liberal treatment. Hardy if given protection, but the most satisfactory method of Wintering is to bury the roots in sand in a cool cellar. In bloom from August to October, with spikes 3 to 4 feet high, and heads of bloom of a rich orange-scarlet producing a grand effect either planted singly in the border or

Hardy Shrubs and Azaleas

For the Hardy Border or Rock Garden

HARDY AZALEAS

The varieties here offered are the hardiest and most desirable for general garden planting; until thoroughly established it is beneficial to give them a heavy mulch of leaves during the Winter, and a loose covering of evergreen branches to protect them from the sun and drying winds during freezing weather.

AZALEA (Pinxter Flower; Swamp Honeysuckle). Each Amoena (Japanese Evergreen Azalea). A dwarf shrub with double purplish red flowers in May; is especially adapted for borders and rock gardens; needs some pro-	Doz.
tection in northern latitudes. Should be planted in sheltered positions and will abundantly repay for any care given it\$2.00 Mollis (Japanese Azalea). Of dwarf habit; resembles rhododendron; good foliage; flowers in all shades of red, yellow and	\$20.00
orange; perfectly hardy, thriving in sunny positions anywhere. Excellent for mass planting. It must not come in contact with barnyard manure	20.00
Hinomayo. A wonderfully pleasing shade of delicate rose-pink. Bushy plants 10 to 12 inches high	12.00
Macrantha. Very late-flowering large salmon-red. Bushy plants, 10 to 12 inches high	15.00
inches high	12.00

HARDY SHRUBS

Varieties Used With Herbaceous Plants in Hardy Plant Borders and Rock Gardens

The few varieties listed below are used to mix with hardy plants in borders and rock gardens.

maray panta			
BUDDLEIA (Summer Lilac).	Three	Doz.	100
Variabilis magnifica (Butterf			
Bush). This is properly a shru but the top usually freezes bac			
and new growth starts from the root like other perennials. Plan			
grow three to four feet and a	re		
covered with long racemes of lila- like flowers in July. The be			
location is in good, rich, we	e11		
drained soil in a sunny situation		\$5.00	\$45.00
Farquhari (New). A low-growing pendulous, spreading shrub, wi			
rich green foliage and silvery r	·e-		
verse, bearing in late Summer lor racemes of purple flowers		5.00	45.00
• •			
CARYOPTERIS (Blue Spirea).			
Mastacanthus. A handsome har perennial; grows about 3 feet his	dy		
and produces rich lavender-bl	ue		
flowers in great profusion t whole length of the branches.	he A		
valuable plant either for beddir	ng		
or pot culture, blooming contin ously from early in Septemb			
until cut by frost		4.00	30.00

COTONEASTER (Rock Spray).

Horizontalis (Prostrate Cotoneaster).

A low shrub with almost horizontal branches. Native of China.

Leaves dark green, about half an inch long; flowers pinkish white; fruit bright red; attractive in rockeries. A most desirable ground cover, and should be largely planted. Cannot be transplanted unless from pots. unless from pots. Strong, 5-inch pot plants 1.00

Azalea Mollis.

Caryopteris Mastacanthus.

Cotoneaster Horizontalis.

Erica—Heath.

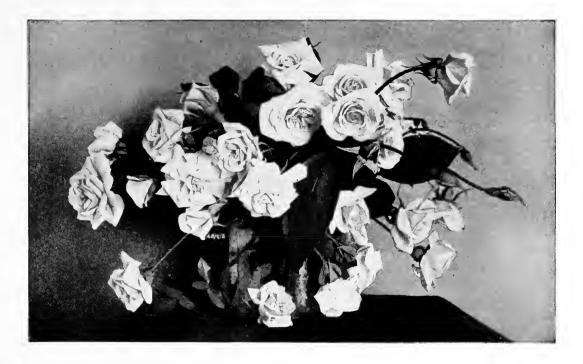

Hypericum Moserianum.

Barberry Hedge.

DAPHNE (Garland Flower). Each Cneorum. Handsome dwarf subshrubs, excellent for planting near	Doz.	100
front of shrubberies, with odorous pink flowers and handsome foliage. Large clumps	\$20.00	
Fenduliforum. An exceedingly grace- ful shrublike plant covered with purplish red flowers in Summer time. Strikingly beautiful 50	4.50	35.00
ERICA (Heath).	4.50	35.00
The Heaths are compact, low-growing plater extremely useful for rockeries. The densely arranged around the wiry little state when in full bloom or in midwinter make picture. Give some protection the first shady location. All our Ericas are strong,	tems, an es a ver: Winter.	d either y pretty Semi-
Vulgaris. (Scotch Heather). A dense-growing shrub, with erect branches, covered with short, closely adpressed leaves. The pretty, bell-shaped flowers occur		
in great profusion toward tops of the shoots and are a pretty rosy color. Big clumps	\$10.00	
Elata alba. (White Heather). The	VIV.00	
diversion from the preceding; a pleasing contrast. Big clumps . 1.00 Nana compacta. Dwarf and com-	10.00	
pact; pink. 9 inch. Big clumps. 1.00	10.00	
HYPERICUM (St. John's Wort). Henryi. The same as Moserianum, though slightly more upright in	Doz.	100
though slightly more upright in growth and much hardier and better suited for cold climates\$1.50 Moserianum. (See page 29) 1.35 Calycinum. (Aaron's Beard). Rapidly growing sub-shrub and ground cover in sun or shade, with golden yellow flowers. 1 ft. July-August 1.50	\$4.50 4.00	\$35.00 30.00
yellow flowers. 1 ft. July-August 1.50	4.50	35.00
Catesbaei. Large. A valuable plant with oblong, shiny foliage, dark green in Summer, turning to a bronzy red in the Fall. The fragrant white flowers are borne in pendulous racemes. Adapted for	Doz.	100
woodland planting\$1.00 VITEX (Chaste-tree; Hemp-tree). Macrophylla. In general habit similar to V. Agnus Castus, but much stronger in all its parts, the foliage being larger while the trusses of lavender-blue flowers are fully double the size. It blooms from July to September; as popular as the Butterfly Shrub, to which we	\$10.00	
consider it superior 1.00	10.00	90.00

Wayside Gardens Choice Roses

HILE primarily growers of hardy perennials and rock plants, customers in ever increasing numbers have been persistently asking us for other plant materials. Desiring to remain hardy plant specialists, we have not gone into the production of nursery stock in general, but Rose growing, fitting in as it does with our hardy plant business, has prompted us to offer Roses. The major part of the work on Roses is done during the Winter when the production of hardy plants and rock plants is practically at a standstill. Being able to take care of Roses during those idle periods has actually helped us to cut cost in our hardy plants.

We have chosen Roses, firstly because they fit in with our business in such a manner as to cut our overhead considerably. Secondly, most all old-fashioned gardens have a bed of hardy Roses somewhere, and so we offer in the following pages a selection of the dependable varieties that have won their spurs in keenest competition. Some of them are old favorites while others were only introduced last year. All of them will be found thoroughly dependable under widely varied climatic and soil conditions.

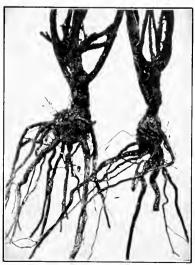

Your Roses will bloom for you in exact proportion as you feed them. They do love rich, friable soil, full of humus and decayed vegetable matter. Bone-meal is one of the best foods for Roses and being very slow to decompose its use cannot be overdone. In our own gardens we apply at the rate of a pound per plant, applying it the middle of May and the end of August.

The Roses we offer are heavy, field-grown, two-year-old, grafted plants, which, in the Fall, are carefully dug, planted in pots and stored in cold greenhouses, or cold frames where artificial heat is used only to exclude the most severe frost. Under this treatment the plants develop in a perfectly natural way and will be ready for shipment from about May 1st on, and can be safely shipped until the end of July. They will be sent to you in strong, paper pots or in the regular flower pots, whichever way you prefer. This method of handling Roses is the best known. We prefer not to send them out until after the 1st of May, as that much time is needed to give

them a good start and make failure impossible. However, if you want them before that date we can ship, but we do not advise it.

Much can be said in favor of budded plants. They are more vigorous, produce finer blooms, and more of them, and are as permanent and hardy as those on their own roots, while many of the very finest varieties will not succeed when grown on their own roots. Therefore, practical men and all those who have had experience growing Roses, give preference to budded plants.

Our Roses are all two-year-old, field-grown, budded or grafted. While some planters prefer Roses on their own roots on account of the possibility of budded plants developing wild shoots, this will rarely occur if deep planting, as directed in our cultural notes, which will be sent with each order, is followed.

Sample of Rose Bush we are offering. Do not compare with the small pot-grown Roses offered. Ours are field-grown Roses in pots. Ready "to go."

Duchess of Wellington.

Hardy Everblooming Hybrid Tea Roses

Under this heading we offer only the very best and most popular, well tried varieties of Hybrid Tea Roses, with the majority of which every lover of the Rose is familiar. We recommend this collection for general planting to the amateur who wishes the finest varieties, and who is desirous of a supply of extra choice flowers to cut throughout the season. There is not one individual sort which we cannot endorse as posessing superior merit; all having been thoroughly tested.

Betty. After this becomes estab- lished it produces blooms of mar- velous beauty, particularly so in the Autumn. Its large, delicious- ly scented flowers are of a glowing	Doz.	100
ly scented flowers are of a glowing coppery rose color, suffused with a golden sheen\$1.00	\$12.00	\$90.00
Caroline Testout. One of the most popular and valuable bedding varieties; large, full, globular flowers of bright satiny rose, with brighter center, very free and fragrant. The Rose that made Portland, Oregon, famous as the Rose City 1.00	12.0 0	90.00
Columbia. This beautiful Rose is not only one of the most popular Winter cut flowers, but has also proven itself a good bedding or garden variety. It is of strong, vigorous habit and exceptionally free blooming. The flowers, of good size, are perfect in form, both in bud as well as when fully expanded. Color a most pleasing shade of rose-pink and delightfully fragrant 1.00		
most pleasing shade of rose-pink and delightfully fragrant 1.00	12.00	90.00
Claudius Pernet. We give below Mr. Pernet-Ducher's own description. "A most vigorous grower of erect branching habit, beautiful, brilliant green foliage, long pointed buds of exquisite shape, carried on long, stiff stems. Very large, full flowers with elongated deep petals; a beautifully formed bloom. Color most striking sunflower yellow, deeper in the center, without any color blending, and which is retained without fading even in the warmest weather." Strong, 2-year-old plants 2.50	30.00	240.00
Duchess of Wellington. The most popular yellow garden Rose. Intense saffron-yellow, stained with deep crimson, changing to a deep coppery saffron-yellow as the flowers are fairly full, with large petals, great substance, delightfully fragrant and very free flowering 1.00	12.00	90.06
Dorothy Page Roberts. Coppery pink, suffused apricot yellow, beautiful in its color shading; free, unique and decorative. Gold Medal N. R. S 1.00	12.00	90.00
Elvira Aramayo. A flaming, arresting color newly applied to roses as "Indian red." This seems to be a unique association of orange-carmine, with tones of madder, salmon and pink. The buds are long and pointed, plentiful, opening into large flowers of cactus shape with some quilled petals; a showy garden type, with straight stems and bushy growth	20.00

Write for our cultural directions on Roses, it will be sent free of charge.

TWO NEW ROSES

MARY WALLACE

Named by the Portland Rose Society in honor of the daughter of Secretary of Agriculture Wallace, originated at the Maryland Station of the Department of Agriculture by the late lamented Dr. W. Van Fleet, one of the world's greatest Rosarians, and is the first of a series of what has been called "dooryard" Roses, that are expected to be of great usefulness and adaptability and to the production of which Dr. W. Van Fleet was giving his best endeavors at the time of his death. The Department describes it as a pillar Rose, making a fine, strong, self-supporting plant 6 to 8 feet high, with large, glossy foliage, blooming with great freedom in Spring and bearing a considerable number of fine buds in Summer and Fall. Flowers very large, generally exceeding 4 inches across; well formed, semidouble, of a bright, clear rose-pink with salmon base to the petals \$1.50 each; \$18.00 per doz. Not supplied in pots.

ROSA HUGONIS

This species, recently introduced from China, is unlike any other Rose. It is of shrub-like habit of growth and naturally forms symmetrical bushes about 6 feet high, and the same in diameter, and while not suited to plant in the Rose border, it is an invaluable subject when planted in connection with other shrubs or as single specimens in the garden.

Its delicate yellow single flowers are produced on long arching sprays early in May, every branch of the previous season's growth becomes lined on both sides to the very tips with these attractive flowers, and after it has finished flowering it remains an attractive decorative bush for the balance of the season; perfectly hardy. Strong, 2-year-old plants, \$1.25 each. Not supplied in pots.

AUSTRIAN BRIAR ROSE

Persian Yellow. An old favorite; very early, fragrant, shrubby type for the yard. Deep golden yellow. 85c each; \$8.00 per 10. Not supplied in pots.

Rosa Rugosa, Rosa Hugonis and Rosa Wichuraiana, not supplied in pots, are shipped early.

Six Choice Varieties

We recommend this collection for general planting to the amateur who wishes a limited number of varieties, and who is desirous of a supply of extra choice flowers to cut throughout the season. Those who desire a more extensive collection can select with perfect confidence any variety in our collection of Hybrid Tea Roses. There is not one individual sort which we cannot endorse as possessing superior merit, all having been thoroughly tested.

This collection shown in colors on page 66.

Caroline Testout

One of the most popular and valuable bedding varieties; large, full, globular flowers of bright satiny rose, with brighter center, very free and fragrant. The Rose that made Portland, Oregon, famous as the Rose City. \$1.00 each; \$12.00 per doz.; \$90.00 per 100.

Claudius Pernet

We give below Mr. Pernet-Ducher's own description: "A most vigorous grower of erect branching habit, beautiful, brilliant green foliage, long pointed buds of exquisite shape, carried on long, stiff stems. Very large, full flowers with elongated deep petals; a beautifully formed bloom. Color most striking sunflower yellow, deeper in the center, without any color blending, and which is retained without fading even in the warmest weather." Strong, two-year-old plants, \$2.50 each; \$30.00 per doz.; \$240.00 per 100.

Laurent Carle

Produces its large, deliciously scented, brilliant carmine flowers throughout the season, nearly as good in hot, dry weather as under more favorable weather conditions. A vigorous grower and as hardy as a Hybrid Perpetual. \$1.00 each; \$12.00 per doz.; \$90.00 per 100.

Mrs. Wakefield Christie - Miller

As a pink bedding Rose there is none better, and particularly so for massing. The flowers, which are of large size, remain perfect on the bushes for a long time, and are produced very freely; they are of a bright pink color with lighter shadings; the plant is vigorous and free. \$1.00 each; \$12.00 per doz.; \$90.00 per 100.

Mme. Edouard Herriot

The Daily Mail Rose. In color its buds are coralred, shaded with yellow at the base; the open flowers of medium size, semi-double, are of a superb coral-red, shaded with yellow and bright rosy scarlet passing to shrimp-red. \$1.00 each; \$12.00 per doz.; \$90.00 per 100.

Soleil d'Or

Color varying from orange-yellow to reddish gold, shaded with nasturtium-red. \$1.00 each; \$12.00 per doz.; \$90.00 per 100.

Suggestions to Customers

CULTURAL NOTES. We have prepared a leaflet which gives concise cultural instructions,

which will be sent free with each order of Roses. SHIPPING. Roses will be shipped in strong, open crates, carefully packed so as to insure safe arrival and forwarded by express, insured.

ABOUT ORDERING. We advise you to order now (early) for future shipment and avoid the disappointment of not being able to get the variety you like best. There never is enough of high grade Roses on the market and there will not be this year.

Lady Ashtown.

Hoosier Beauty.

Six of the Well Known Favorites

Especially recommended for cutting.

This collection shown in colors on page 67.

Hoosier Beauty

Acknowledged to be one of the best high colored varieties, an intense, rich dazzling crimson-scarlet, beautiful, well shaped, long buds and good sized full flowers and deliciously scented. Strong, two-year-old plants, \$1.00 each; \$12.00 per doz.; \$90.00 per 100.

Lady Ashtown

A very free-flowering variety, producing fine blooms throughout the season. The flowers are large and of a delicate soft rose color, shading to yellow at the base. \$1.00 each; \$12.00 per doz.; \$90.00 per 100.

Milady

Crimson-scarlet. Color similar to Richmond. Flowers large, full and well formed, carried on stiff stems. \$1.00 each; \$12.00 per doz.; \$90.00 per 100.

Mrs. Aaron Ward

A remarkably floriferous variety of strong, vigorous, but compact growth; the flowers, which are of splendid form, full double, are equally attractive when full blown as in the bud state; in color a distinct Indianyellow, shading lighter towards the edges. \$1.00 each; \$12.00 per doz.; \$90.00 per 100.

Ophelia

A variety which has made a record for itself that qualifies it to be classed with the very best; a Rose that is admired by everyone; its flowers are held erect on long, stiff stems, are of perfect form, good size, and of a most pleasing delicate tint of salmon-flesh, shaded with rose; very floriferous. \$1.00 each; \$12.00 per doz.; \$90.00 per 100.

White Killarney

A duplicate of the charming pink Killarney, with flowers white as snow. \$1.00 each; \$12.00 per doz.; \$90.00 per 100.

ROSA RUGOSA Hybrids

A valuable, perfectly hardy type much used in landscape work; the heavy wood and shrubby formation adapting it to hedges and hardy borders, or to mixed shrubby groups. The foliage is lustrous, dark green, usually corrugated, and is impervious to attacks of insect pests. Flowers are borne in clusters of varying size and construction, are succeeded by persistent fruits which carry their usefulness into Winter.

85c each; \$8.00 per 10. Not supplied in pots.

Belle Poitevine. Very free and branching, every tip laden with immense large pink bouquets. Buds very long; perfume exquisite.

Chas. Fred'k Worth. Attractive, deep green foliage, deeper and darker than the other Hybrids; flowers deep crimson with carmine shadings; fairly double.

Conrad Ferd. Meyer. An early-flowering Hybrid combining the ornamental qualities of its Rugosa foliage with the blossom beauty and perfume of the Hybrid Perpetuals. Flowers large, cup-shaped and double; of a delicate silvery pink.

Nova Zembla. Similar in character to C. F. Meyer, with beautiful pure white flowers.

NEW HYBRID RUGOSA ROSE F. J. GROOTENDORST

This is a new type of Rose, which might properly be called a Rugosa Baby Rambler, being a cross between Rugosa and the crimson Baby Rambler. Imagine a shrublike Rugosa Rose covered with trusses of crimson Baby Rambler Roses and you will have a fair conception of this new hybrid variety. It is not a Rose that you want to plant in with your bed of Hybrid Tea and Hybrid Perpetual Roses, but is valuable to plant as an isolated specimen or in a mass in a bed in an exposed position or among shrubs in the shrubbery border or use it for an everblooming hedge for which purpose it is admirably adapted. It is absolutely hardy and continues in bloom until late in the Fall. Not supplied in pots. Strong 2-year-old plants, \$1.00 each; \$10.00 per doz.; \$75.00 per 100.

MOSS ROSES

A beautiful species distinguished by the moss-like covering of their buds. Vigorous, stocky growth, lustrous foliage and perfect hardiness; the flowers usually large and, although they bloom but once a year, retain their beauty exceptionally long.

85c each; \$8.00 per 10.

Countess of Murinais. White, beautifully mossed.

Crested. Deep pink buds, surrounded by a mossy fringe and crest; exquisitely fragrant.

Deuil de Paul Fontaine. Deep crimson; constant.

WICHURAIANA ROSES

All are new Wichuraiana Hybrids of American origin, hardy in all sections, and are literally Tea Roses with climbing or trailing habit and undeniable hardiness. All bloom in clusters.

Rosa Wichuraiana (Memorial Rose). Handsome for covering rockeries, mounds or embankments; especially valuable for evergreen cemetery planting. The pure white single flowers appear in greatest profusion during the month of July. 75c each; \$7.00 per 10.

HYBRID WICHURAIANA

75c each; \$7.00 per 10.

Debutante. Blooms freely under all conditions, presenting a fine show of pure white clusters.

Jersey Beauty. Fragrant single flowers in clusters. Pale yellow, with conspicuous tufts of bright yellow stamens.

Pink Boamer. Large, single, in striking clusters; pink, with white center. One of the prettiest.

South Orange Perfection. Double flowers, about 1½ inches in diameter. Soft blush pink at the tips, white.

Sweetheart. Rosy pink, produced freely and continuing in bloom a long period of time.

Thiversal Favorite. A vigorous groups florier double of

Universal Favorite. A vigorous grower; flowers double, of a beautiful rose color; very fragrant.

Rugosa Rose, F. J. Grootendorst.

Moss Rose

Anna de Diesbach. Bright carminerose; a beautiful Rose of large size \$1.00

Clio. Delightful satiny flesh with deep center; the flowers are large, globular and borne on long stems 1.00

George Arends or Pink Frau Karl Druschki. This is a pink, or rather a tender rose colored form of the popular white Frau Karl Druschki, possessing not only the exquisite form, large size, and remarkable free flowering habits of its parent, but in addition to this, it is also highly perfumed; a Rose worthy of a place in every garden 1.00

ugh Dickson. Brilliant crimson, shaded with carmine, good in size and form; very fragrant 1.00

TEN BEST HARDY GARDEN HYBRID PERPETUAL ROSES

The varieties listed below are unquestionably the best that can be selected in the Hybrid Perpetual class, which, before the development of the Hybrid Teas, was the most popular type for garden planting, and even now they dare not be overlooked, but should be used extensively in conjunction with the other sorts, and especially so in localities where the hardiness of the Hybrid Tea varieties has not been established. The collection here offered embraces s complete a range of colors as it is possible to bring together in such a number of plants, with freedom of ilowering, perfect form, fragrance, hardiness and general excellence.

In pruning Hybrid Perpetuals, cut away all weak growth, and if quality of bloom is desired, cut back the strong canes to within 8 or 9 inches of the ground, but if quantity of bloom for garden effect is desired, leave these canes from 2 to 3 feet high, according to their strength.

The following varieties all 2-year-old, potted plants. Twenty-five plants of one kind supplied at 100 rate.

100 (Magna Charta. Bright pink, suffused with carmine; a beautiful Rose, and	Doz.	100

90.00	of the best known Roses in cultivation; does well everywhere 1.00	12.00	90.00

BABY RAMBLER ROSES

12.00

12.00

A type of Roses which is deservedly very popular for bedding purposes. They form shapely, compact, bushy specimens, most of them growing about 18 inches high, producing in great profusion, from early in the season until severe frost, immense trusses of small flowers. Pruning is not necessary; simply remove the past season's flower stems.

Eblouissant (New). A beautiful garnet red Baby Rambler, very free flowering and excellent bedding variety		100	Orleans. compa liant fused

Hardy Climbing and Rambler Roses

Climbing Roses require no pruning in the Spring beyond the cutting out of very old or dead wood, and the shortening of the laterals and long canes to make the growth conform to the space to be covered; but a severe pruning in July, directly after they have finished flowering, is beneficial. Cutting away at that time all old flowering wood will encourage a vigorous growth, which will give an abundance of flowers the following season.

We offer on this page a selection of twelve of the best modern Hardy Climbing and Rambler Roses.

American Pillar. A single-flowering variety of great beauty. The flowers are of large size, 3 to 4 inches across, of a lovely shade of pink, with a clear white eye and cluster of yellow stamens. These flowers are borne in immense bunches, and a large plant in full bloom is a sight not easily forgotten. 75c each; \$9.00 per doz.; \$60.00 per 100.

Dr. Van Fleet. A Rose, which on account of its dainty color and exquisitely shaped buds and flowers, appeals to everyone. The long, pointed buds are of a rich flesh pink on stems 12 to 18 inches long. Splendid for cutting. 75c each; \$9.00 per doz.; \$60.00 per 100.

Excelsa. H. W. This sort is also known as "Red Dorothy Perkins," and carries the glossy varnished appearance of foliage shown by that sort, assuring a constant shade all Summer wherever used. The flowers of scarlet-crimson are borne in large trusses, are very double and large, and are produced with the greatest profusion. It is the most valuable sort of its type. 75c each; \$9.00 per doz.; \$60.00 per 100.

White Dorothy Perkins. H. W. A pure white climber, identical with Dorothy Perkins except the color. Without doubt the best white climber. 75c each; \$9.00 per doz.; \$60.00 per 100.

Plower of Fairfield. CL. P. Also called the "Everblooming Crimson Rambler." Combines the beauty of the well known Crimson Rambler with a continuous blooming habit, the new growth bearing large clusters of crimson blooms through the Summer continuously. Be sure to include this sort in your selection. 75c each; \$9.00 per doz.; \$60.00 per 100.

Paul's Scarlet Climber. No other Rose, in any class, can compare with this for brilliancy of color, which is a vivid scarlet. Flowers are semi-double, very freely produced in clusters of from 3 to 20 flowers each on much branched canes. It is of strong climbing habit and perfectly hardy. One of the most popular climbing Roses. 75c each; \$9.00 per doz.; \$60.00 per 100.

Roserie. Of same habit of growth and flowering as Tausendschoen, but of a deeper and more even shade of cerise-pink or carmine; a strong, vigorous grower and free bloomer. 75c each; \$9.00 per doz.; \$60.00 per 100.

Silver Moon. Different from all other Roses, with beautiful semi-double flowers 4½ inches and over in diameter; pure white in color, petals of great substance, beautifully cupped, forming a clematis-like flower. The large bunch of yellow stamens in the center adds to its attractiveness. 75c each; \$9.00 per doz.; \$60.00 per 100.

Climbing American Beauty. Its name is somewhat misleading, but it is one of the best climbing Roses. A strong, healthy, vigorous grower, frequently making shoots from 10 to 12 feet long, and good sized flowers for a climbing Rose that blooms so freely. Color a pleasing rose-pink; of splendid form; good substance. 75c each; \$9.00 per doz.; \$60.00 per 100.

Dorothy Perkins. Soft shell pink; flowering profusely in large clusters. Very fragrant and lasting. A grand Rose in every way. 75c each; \$9.00 per doz.; \$60.00 per 100.

The Best Scarlet Climbing
Rose Offered Today

Special Announcement to Garden Clubs

URING the past Summer we have secured about two hundred colored lantern slides of the most popular hardy perennials for both borders and rock gardens. While this does not embrace every class offered in our catalog, yet we hope to add to the collection so that by next year we will have a complete collection of slides showing the plants under actual growing conditions in our nursery.

Further, we are prepared to make arrangements

with Mr. Shipman, of Willoughby, Ohio, who is a very keen naturalist and a wonderful photographer to show his collections of colored slides of birds and bird life and also wild flowers. Incidentally, we are indebted to Mr. Shipman for helping us in tinting our slides.

Garden Clubs interested in having these very instructive colored slides shown should write us for further information and conditions under which they may be obtained.

Hard Wood Ashes

Unleached hard wood ashes are the best source from which may be derived the most needed fertilizer—POTASH. Ninety-five per cent of the gardens in the United States today need Potash badly. Phosphates and nitrates, as a rule have been abundantly applied by most gardeners, but potash, owing to its scarcity has not been used where it ought to have been. We have contracted with a very large hard wood lumber company to supply us with all the hard wood ashes needed

on our own nursery, and we have put up a few hundred barrels so that we may be able to help our customers in securing this most valuable material. Apply it either in the Fall or Spring at the rate of one pound to ten square feet. Hard wood ashes cannot be sold in bags, and are therefore offered in barrels weighing 200 lbs. each. We charge \$3.50 for a 200-lb. barrel; \$16.00 for 1000 lbs.; \$31.00 for 2000 lbs.

Imported Dutch Peat

Imported Granulated Dutch Peat is used with excellent results in the making of garden soils, especially those soils that are very heavy, or very dry. Peat stimulates the development of roots of all plants and in the Summer it is an excellent moisture retainer, as it absorbs more than eight times its own weight in water. For mulching perennial beds it is ideal. A slight covering of two inches thrown over the bed will prevent all freezing and heaving. As a mulch for straw-berries, it cannot be improved. When the Winter is over, peat may be dug in and should not be removed. It acts, therefore, in a double capacity. If one wishes to plant such shrubs as Rhododendrons, Kalmias, Azaleas, Blueberries or Arbutus, (all these shrubs and plants like an acid soil) we can safely guarantee that soil prepared with 50 per cent Peat and 50 per cent top soil will grow any of these plants mentioned to perfection.

Do not be mistaken, Peat is not a fertilizer,

although often sold as such. It is a decomposed plant material which loosens the soil and prepares it so that the most delicate plants and trees may be grown to perfection. We do not advise its use for the making of lawns as we do not believe that it does very much good there, but it may be applied with good success in the making of a vegetable garden, solely as a material to prepare the soil, eliminating the necessity of bringing in large quantities of top soil.

It is also an excellent ground cover under evergreens, Rhododendrons and Azaleas, keeping the soil moist and cool during the hot Summer, giving an exceptionally tidy appearance under these shrubs, as they should never be cultivated.

Peat may be stored in a garage or woodshed for any length of time, as there is nothing that will or can spoil it. We offer bags of 20 to 25 lbs. for \$1.00 each. One such bag will cover about 12 square feet 2 inches deep.

Planting Table for Plants, Bulbs and Roses

PLANTING. The table below shows the number of plants or bulbs required to fill a circular bed of the dimensions given. In planting begin at outside row—where 6 inches apart, 3 inches from edge of bed: where 12 inches apart, 6 inches from edge of bed. It is customary among professionals in planting a bed to set the plants or bulbs somewhat closer together in the two outer rows, giving more space between each plant or bulb toward the center of the bed.

Diameter of bed	6 in. apart	12 in. apart	18 in. apart	24 in. apart	30 in. apart	Diameter of bed	6 in. apart	12 in. apart	18 in. apart	24 in. apart	30 in. apart
3 feet 4 " 5 " 6 " 7 " 8 " 9 " 10 " 11 "	28 48 80 112 152 200 256 320 380	7 12 20 28 38 50 64 80 95	6 8 13 17 23 28 36 42	7 9 12 16 20 24	13 16	12 feet 13 " 14 " 15 " 16 " 17 " 18 " 19 " 20 "	452 528 612 704 804 904 1016 1132 1256	113 132 153 176 201 226 254 254 283 314	50 59 68 78 89 100 113 126 139	28 33 39 44 50 57 63 71 78	18 22 25 28 32 36 40 46 50

A square bed will take about the same number of plants. For an oval bed, add length and breadth and divide by two. For example, an oval 9 feet long by 7 feet wide will require same number of plants as circular bed 8 feet in diameter.
